LIVE VIEW TRACKING PROVIDES REAL TIME INSIGHTS THAT HELP REDUCE COSTS, ENHANCE SAFETY AND INCREASE PRODUCTIVITY BY ENABLING SMARTER, DATA-LED DECISION MAKING.

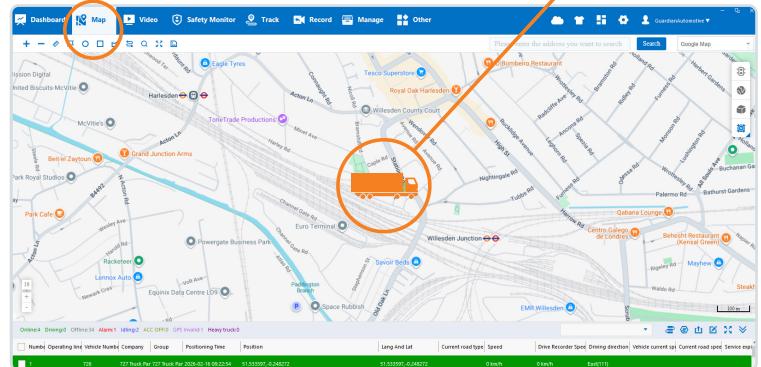

REAL-TIME MONITORING

Instant Visibility: With live view tracking, fleet managers and operators can monitor the vehicle's surroundings in real-time. This means they can continuously watch over the cargo, driver, and the road ahead, all while the vehicle is on the move.

Remote Access: Subscription based live view services offer mobile or web access, allowing fleet managers to monitor the vehicle from anywhere at any time. This makes it ideal for managers who need to keep track of multiple vehicles across wide areas.

MAP LOCATION AND SPEED

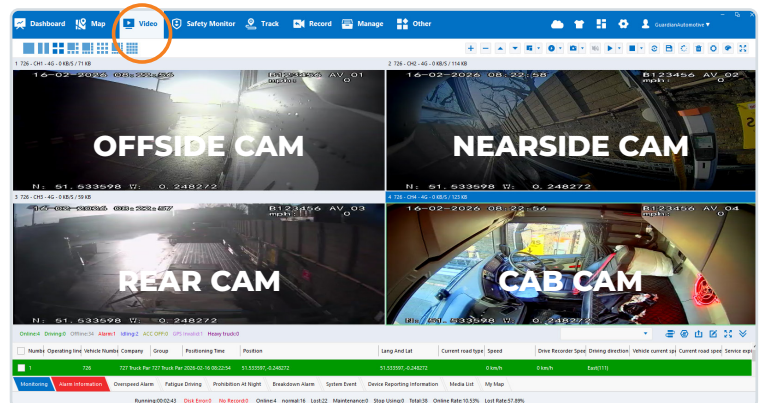

OPTIMISED FLEET MANAGEMENT

Centralised Monitoring: Multiple vehicles can be monitored simultaneously, streamlining fleet management. This provides a single platform for overseeing both vehicle location (via live tracking) and visual monitoring (via live CCTV feeds).

Tracking Vehicle and Cargo in Transit: Live view tracking allows for constant monitoring of the vehicle and cargo during its journey, ensuring that both are secure and any anomalies are detected in real time.

Efficient Dispatching: By utilising live tracking data, fleet managers can optimise routes and dispatch vehicles more effectively, knowing exactly where each truck is at any given moment.

IMPROVED INCIDENT MANAGEMENT

Accident and Incident Documentation: In case of accidents or disputes, the live CCTV footage can provide crucial evidence to support insurance claims or resolve liability issues. This real-time documentation can be used in investigations to clarify what happened.

Faster Response to Incidents: With live tracking, fleet managers can quickly assess situations like accidents, breakdowns, or traffic delays, allowing them to respond faster and more effectively, minimising downtime and operational disruption.

IMPROVED EFFICIENCY

Time-Saving: With access to live footage, you can quickly determine if there's an issue that requires attention, without having to wait until after an event to review recorded footage. This can be particularly valuable in fast-paced environments.

Streamlined Operations: Multiple camera feeds can be monitored simultaneously on a single screen, offering a more comprehensive and efficient way of managing security.

5 CHANNEL 1TB DIGITAL RECORDER

1080P
FHD

FREE 1TB
HARD DRIVE

10-32v

Supports up to 4 x 1080p HD & 1 x IP Cameras
Key Lockable Data Storage up to 1TB SSD
& 1 x 128GB SD Card
1TB Hard Drive Included - Up to 600 hours recording
GPS Data | G-Force sensor
H.56mm W.152mm D.177mm

Suitable for use with all Guardian
Monitors and Cameras

DVR4HDL

HD DVR - LIVE VIEW READY ●

DVR4HDLT

HD DVR
INCLUDES 12MTH LIVE VIEW ●
TRACKING SUBSCRIPTION

7" FHD CCTV REVERSING SYSTEM WITH 1TB RECORDING

Monitor MON27HD
Recorder DVR4HDL with 1TB SSD
Cameras CAM30, CAM35, CAM33S x2
Full Fitting Kit

Fitting service available nationwide
Please contact us for further information

The recorder (DVR4HDL) is Live View ready and can be used as a part of a full CCTV system or as additional recording for existing monitors and cameras. To access the benefits of live CCTV feed and tracking a Live View subscription is required.

STAY IN CONTROL WITH GUARDIAN LIVE VIEW SUBSCRIPTION

Harness the power of advanced connectivity, intelligent data integration to gain real-time fleet visibility. Make smarter decisions, anticipate challenges, and stay ahead of the competition.

Real Time Alerts - Stay ahead of potential issues with instant notifications for speeding, harsh braking, excessive idling, route deviations, and more. Monitor fleet activity as it happens, take immediate action when needed, and maintain complete operational control at all times.

Enhance Driver Performance - Leverage telematics insights to pinpoint risky driving behaviours and provide targeted coaching. From speeding to aggressive cornering, gain the visibility you need to promote safer habits, reduce incidents, and foster a strong culture of accountability across your fleet.

Investments in telematics typically see a ROI within 6-12 months with **Reductions in Fuel Consumption, Reduced Accident Costs, Lower Insurance Premiums, Reduced Maintenance & Extended Asset Life**

ALTERNATIVE CCTV SYSTEMS AVAILABLE

7" FHD REVERSING KIT

CCTV24HD

2 Camera Inputs with Mirror or Normal Switching
Audio Function | Remote Control

M: H.115mm W.172mm D.49mm
C: H.77mm W.86mm D.65mm

Monitor MON24HD | Camera CAM37 | Full Fitting Kit

7" FHD SINGLE OR QUAD VIEWING

D1 / 720 / 1080P Auto Sensing | Audio Function
Remote Control | ECE R10, EMC, CE, UKCA

CCTV27HD

SINGLE SCREEN VIEWING

3 Camera inputs with mirror or normal switching

CCTV27QHD

SINGLE, SPLIT, TRIPLE, QUAD VIEWING

4 Camera inputs with mirror or normal switching

M: H.113mm W.195mm D.27mm (Excl. Visor)
C: H.77mm W.90mm D.70mm

Monitor MON27HD/27QHD | Camera CAM30 | Full Fitting Kit

Our CCTV27QHD allows drivers or fleet managers to monitor multiple angles simultaneously, providing a comprehensive view of the vehicle's surroundings.

CCTV14HD

3 Camera Inputs with Mirror or Normal Switching
Audio Function | Remote Control

M: H.118mm W.160mm D.25mm
C: H.77mm W.90mm D.70mm

Monitor MON14HD | Camera CAM30 | Full Fitting Kit

DC1 4K FHD DASH & REAR CAMERA

Supports up to 128GB Micro SD - 32GB Micro SD included
G-sensor | Parking mode (Via optional DC1 LEAD)
Built in GPS | Loop recording | Night vision
3 Metre USB-C to USB-A Power Lead

Dash Cam: H.57mm W.85mm D.48mm
Rear Cam: H.40mm W.61mm D.38mm
